

6. Control of Corruption (CC)

Control of Corruption (CC) captures perceptions of the extent to which public power is used for private gain, including both petty and grand corruption, as well as capture of the state by elites and private interests.

The table below lists the individual indicators drawn from each underlying data source and incorporated into the revised WGI. These indicators represent the specific questions or variables used to estimate the CC governance scores for the most recent year available. In some cases, question wording differs in earlier years, and three data sources have been discontinued (but continue to be used in the calculation of governance measures for the past years in which they were available). Users should consult the WGI website for a [complete list](#) of source-specific data files containing all historical indicators.

Before the data are used in the aggregation model, each question or variable is rescaled to range from 0 to 1, with higher values corresponding to better governance outcomes. When a data source includes multiple questions or variables related to the same dimension, the rescaled values are averaged to produce a single source–dimension input prior to aggregation. This ensures that each source contributes only one signal per dimension and prevents data providers with more questions from being given undue weight.

Representative Sources

Code	Question or Variable
EIU	Corruption Vested interests/cronyism
GCS	Diversion of Public Funds Ethical behaviour of politicians Irregular payments in exports and imports Irregular payments in judicial decisions Irregular payments in public contracts Irregular payments in public utilities Irregular payments in tax collection
GWP	WP146 Corruption widespread throughout the government (%YES)
PRS	Corruption
VDM	Corruption Index (v2x_corr)
WBS	corr11 Corruption as an obstacle corr4 Percent of firms expected to give gifts to public officials to get things done graft3 Bribery incidence
WJP	Factor 2: Absence of Corruption
WMO	Corruption

Non-representative Sources

Code	Question or Variable
ADB	Transparency, Accountability & Corruption in the Public Sector
AFR	Corruption: government officials Corruption: judges and magistrates

Code	Question or Variable
	Corruption: office of the Presidency
	Corruption: tax officials
ARB	In your opinion, to what extent is the national government working to crackdown on corruption in your country?
	To what extent do you think that there is corruption within the national state agencies and institutions in your country?
ASB	Quality of Governance: Have you or anyone you know personally witnessed an act of corruption or bribe-taking by a politician or government official in the past year?
	Quality of Governance: How effective is the government in cracking down on corruption?
	Quality of Governance: How often do you think government leaders break the law or abuse their power?
	Quality of Governance: How widespread do you think corruption and bribe-taking are in the national government in capital city?
	Quality of Governance: How widespread do you think corruption and bribe-taking are in your local/municipal government?
